

RECOGNISE

Who can be involved?

Anyone who has:

- Had a stroke, or more than one stroke
- May or may not have hand, arm or shoulder pain
- Not had a stroke, and may or may not have hand, arm or shoulder pain (so that we can make comparisons)

How can I start?

Participation is easy!

You simply need to log onto the following website: <http://research.noigroup.com>

From here, you can click onto the “Stroke Laterality Study: Recognising left from right arms by individuals with stroke” study link. This will take you directly to the information sheet, where you can learn more about the study, and agree to participate if you wish.

You will then be able to commence the study straight away.

RECOGNISE

Project Title:

Stroke Laterality Study: Recognizing left from right arms by individuals with stroke

An information flyer for participants

March 2015

RECOGNISE

“Recognise” is a research study being conducted by the Florey Institute of Neuroscience and Mental Health, associated with the University of Melbourne. The research is being conducted by Prof. Leeanne Carey and colleagues.

“Recognise” aims to investigate any changes in recognition of body parts that occur following a stroke. The possible effect of pain on these abilities will also be noted.

RECOGNISE

What does participating in “Recognise” involve?

- Answering some simple questions about yourself (you will not need to provide any information that could identify you)
- Completing some questionnaires regarding your stroke and pain experience if relevant
- Performing a series of on-line interactive tasks

RECOGNISE

Who is involved?

Participation is performed solely by the participant, in the comfort of their own home, providing there is internet access.

What does participation involve?

Participation involves answering a series of questions followed by four on-line tests that will assess the participant’s ability to identify the orientation of various images.

How long does participation take?

Participation is completed in one session. A usual session is expected to take approximately thirty minutes.

Where can participation occur?

Participation can occur in any location by choice of the participant, providing there is on-line access available. It is recommended that it is performed in a quiet environment where the participant is able to sit comfortably and be undisturbed.

When can it start?

Participation can occur at any time that is convenient for the participant.
